## Track any package, freight and shipment

Having bought in the online store always want to know where the package is now? To save time checking the sites of postal companies manually, I created "**Parcels**" website and mobile apps which will automatically check every relevant postal, courier and logistics company website on your behalf.

To find out where your parcel is, you need to know only tracking number of your package.

## What is a tracking number?

Tracking number or tracking code is a unique number assigned to each package, which allows you to monitor the movement of the parcel between the countries or even inside one country.

Tracking numbers can be international or traceable only within the country of the sender.

The tracking number in the format of the Universal Postal Union looks like RA123456789CN, where the first 2 letters are the type of package and the last 2 letters are the code of the country of origin. Packages with such numbers can be tracked right until delivery.

Other shipments can be delivered by courier, transport and logistics companies, and how tracking codes look can vary a lot: CTAFT0000160477YQ, UPAAB000000251682107, AEL10105033654UA, SGADN143797855. Such packages are not always trackable in the recipient's country, and you'll have to wait for notification from the Post Office or a call from a courier company.

## Tracking eBay order

eBay sellers use multiple delivery and postal companies depending on item price and selected shipping method. Whether it's SpeedPAK, Pitney Bowes, Global Shipping Program, China Post, Winit, Yanwen or any other shipping company we've got your back. Read our extensive guide to tracking eBay orders (/en/shops/ebay).

## Delivery time

Wondering how long it will take for your order to arrive to United States, UK, Canada, Australia or any other country? Wonder no more, with our state of the art delivery time estimation algorithm you'll always informed when to expect your parcel. We collect extensive delivery time statistics for each package going into each country and city and will use all of this data to get you most accurate estimated date of arrival.
